## Easily update your phone system and boost performance

TelNet OfficeEdge Essential Integrated Access provides a complete communications solution that works with your current phone system to give your business an edge. Get business essential services such as clear, reliable voice connections and high-speed Internet access, plus enhanced features that help you be more productive, all tailored to your business.

#### Get consistent, crystal clear call quality.

Our service is designed to deliver better overall connections with the combined advantages of traditional telephony with the latest IP (Internet Protocol) technology.

#### Gain flexibility and get more from your service.

Buy just what you need, when you need it. You can easily adjust the number of voice lines available as your needs change. Use your current Internet provider, or use TelNet. Service turnup is smooth, fast and worryfree.

#### Be prepared.

Our Call Forward Unreachable feature is built in so calls can be automatically redirected to another phone or location if something prevents calls from completing at your physical sites. It's an important part of your company's business continuity plans to ensure you won't miss a call.

#### Improve savings and productivity.

Communications flow at peak efficiency with both voice and data services leveraging your Internet and network connectivity. Smart tools and enhanced calling features make it easier to get things done. It's a great way to upgrade your outdated phone system, improve efficiency and save big!
