Reliability and speed to move your business forward

For high speed Internet connectivity, count on TelNet for cost-effective services that match your business to a T. TelNet OfficeEdge Internet gives you the power to get business done, fast and efficiently. It is just one service in a suite of powerful IP-based communications solutions, including integrated voice and data, SIP trunking and hosted PBX to meet all your business needs.

Transfer large amounts of data, instantaneously.

Whether accessing web applications critical to your business, uploading files, streaming video or sending email, count on TelNet to do it fast and reliably. Scalable options deliver simultaneous upload and download speeds -- all dedicated to your Internet service.

Connection is always on, never shared.

You can be assured optimum performance and privacy with dedicated OfficeEdge Internet service.

You get a reliable single source solution.

Service includes your connection, customer premise equipment (if needed,) and installation - all from one company you can count on.

Low, flat monthly rate makes dedicated Internet affordable.

You get the 'big business' capacity and speed you need to compete, at a price that's more affordable for small to medium-sized business.

Get more speed when you need it.

Your service is tailored and scalable to your business. That means you get the service that works best for you now, and you can easily add as you grow. No hassle, no fuss. You just get better service that's easy to manage, very reliable and never obsolete.
