

Cloud PBX

Cloud PBX delivers all the communications services your business needs

Work Smarter and On-the-Go

Features like simultaneous ring, call forwarding, and digital fax empower you to conduct business away from your office as if you were there. 3-way calling and Meet-Me conferencing make it easy to collaborate in an instant to get things done. It connects to your home office and mobile phone, as well as your remote PC or TelNet IP phone on-the-go for seamless communication.

Gain Control and Flexibility

Improve every interaction. With automated attendant and other features, you can easily control how calls are handled to make the most of every contact. Office-to-office extension dialing provides easy (and free!) calling between your locations. New features, upgrades, moves and changes are handled effortlessly, without lifting a finger or interrupting your service.

Be Prepared

Our Call Forward Unreachable feature can automatically redirect calls to another phone or location in the event calls cannot be completed at your physical sites. It's an important part of your company's business continuity plans.

Improve Your Bottom Line

Lower your total cost of ownership. Get started and keep up with all the telephony advances, without a large capital investment in easily outdated systems, equipment or technologies. It's simple to save up front and every step of the way.

Get to Know TelNet Worldwide

TELNET
WORLDWIDE
