MICROSOFT CALLING COST COMPARISON

Microsoft Teams users looking to optimize their communication platform with PSTN calling have two options: **Microsoft's Calling Plan or Direct Routing.** While Microsoft's Calling Plans are native to Microsoft 365, they only allow for one-to-one usage, meaning each employee must have their own dedicated call path at all times, whether they're using it or not. With TelNet's Direct Routing solution, users are able to share those call paths in a one-tomany model. SIP Paths are pooled and an individual will automatically occupy a SIP path during a call. Calling capacity can be adjusted as needed, so you can save on your monthly recurring costs.

* Volume Discounting Available ** 3,000 Minutes (Inbound and Outbound, Local and Long-Distance) Included in \$12 User Fee, Plus An Overage Fee of \$0.03 Per Minute

It's worth noting...

Available minutes are compounded when you purchase Microsoft's Call Plan licenses. So let's say your organization needs 10 licenses — you end up with 30,000 minutes. Are your 10 teammates really going to need all those minutes or are you just overpaying for time you will never use?

Example MRC Comparison

	Microsoft Calling Plan	TelNet Direct Routing
400 Users	\$4,800	\$0
100 SIP Paths	\$0	\$1,100
400 Telephone Numbers	\$0	\$100
3 Toll Free Numbers	\$36	\$15
1,500 Local Minutes	\$0	\$0
1,500 Long Distance Minutes	\$0	\$28.50
Total Monthly Recurring Cost	\$4,836	\$1,243
Total Investment (36-Month Term)	\$174,096	\$44,640

THAT'S A SAVINGS OF 75%!
