Contact us for smart, efficient solutions for your business.

Optimize your business in the Cloud to secure your future.

TelNet Cloud & Data Center solutions deliver the power, speed, capacity and security you need to move your business forward. TelNet partners with the brightest stars in the industry to offer exceptional service with the latest in technology, innovation and expertise. Get essential services that deliver and store valuable content more efficiently and reliably, at ultra-fast speeds, with very low latency.

Power
Rich, reliable & robust resources.

Expect the power you need to keep your mission-critical communications flowing. Our data center's 2N UPS design is leading edge, with A, B, C & D systems powering all cabinets with active-active feeds. Load densities of 60-600 watts per square foot are standard, with custom options for more.

Capacity
Plenty of room for you, with room to grow.

No matter what your business needs, we've got space, power, service and capacity to spare. Expecting growth? Need to cover overflow? Or prepare for an unlikely catastrophe? We can help you handle that.

Security
Secure your valuable assets.

We take security, and business continuity very seriously. Whether it's your servers stored at our Tier III design facility, your hosted data assets, or your cloud-based services, you expect them to be safe and 'always on'. We have the technology and practices in place to keep your content protected, both here and across diverse, secure locations.

TELNET

21005 Lahser Road, Bldg 4
Southfield, MI 48033

Secure your future with confidence.

TelNet Worldwide offers unparalleled reliability and service with Southeast Michigan's premier Tier III data center and a growing roster of ultra-efficient data center solutions. This purpose-built, secure facility is strategically located and designed to offer businesses every advantage of rich power, network and carrier diversity, with the lowest possible latency.

SPACE

- 40,000 sq. ft. facility; 20,000 sq. ft. white space; 30" raised floor space for tenant racks and cages
- Secure storage, two carrier-neutral Meet-Me rooms and innovative product demo room
- Environmental systems are located in separate suites, maximizing customer designated areas

POWER

- Capable of +20kW per cabinet
- Capable of 600+ watts per square foot power density
- Concurrently maintainable generators with onsite fuel reserves and preferred refueling contracts
- Leading 2N power design with diverse A, B, C & D power feeds and redundant PDU distribution
- Fully redundant UPS AC power with bypass switch and surge protection
- Flexible configurations and power options are standard

SECURITY

- Multi-stage security systems include PIN plus live video authentication, mantraps and strict access protocols
- 24/7 color CCTV/video surveillance with >90 day video storage

MONITORING

- 24/7/365, complete environmental monitoring and reporting systems
- Local and national network operations centers (NOC)
- Highly certified technicians provide prompt resolution/problem escalation
- Custom Data Center Infrastructure Management (DCIM) system enables a single secure view into our infrastructure; provides customers 24/7 visibility into their space, power and connectivity
- DCIM boosts the effectiveness of alarms, monitoring and ticketing
- Network Management System (NMS) provides network and capacity management metrics

NETWORK / CONNECTIVITY

- Diverse fiber building entry points
- Secure fiber vaults in close proximity for convenient customer access
- Carrier-neutral facility with ready access to local and national providers

COOLING

- N+1 standard across all environmental control systems
- Temperature and humidity are controlled and managed to industry standards

TECHNICAL / NOC SUPPORT

- 24/7/365 NOC services
- Remote hands and on-site support
- TelNet's certified technical services team is available for prompt, accurate configuration and troubleshooting
- Assures expert design, build, implementation and maintenance of your equipment and services

Designed to meet the highest standards:

U.S. GREEN BUILDING COUNCIL LEED SILVER USGBC · AICPA SOC formerly SAS 70 Report · HIPAA Compliant · PCI DSS COMPLIANT
