

System Administration Portal

Easily manage your cloud-based phone system from anywhere in real time

This web-based application gives you the power to manage your cloud-based phone system and make real-time service changes with the click of a button. Adjust call routing, configure features and manage your service with do-it-yourself access.

Save Time

Make adjustments quickly and easily and on your own. There's no need to reach out to your service provider to make changes on your behalf.

Increase Productivity

Spend less time managing individual phone and service changes and more time working on your core business tasks.

Reduce Costs

With do-it-yourself access, there's no need for costly technician site visits or pricy annual maintenance contracts.

Take Control

Customize your phone system to meet your needs on your timeframe. Change passwords, view call history and restrict certain calls at will.

Get to Know TelNet Worldwide

Too many businesses struggle with communication technology that's ineffective and frustrating. **We're changing that.** Our empowering, cloud-based solutions simplify the way you communicate and collaborate.

Key Features

Call History

View call history for entire organization or search by user, number or date range.

Voicemail Features

Manage all voicemail features from voicemail to email to number of rings before voicemail.

Easy Access

Access a list of quick dial feature access codes (i.e. dial *610 to change number of rings before voicemail).

HD Conference Bridges

Create and manage high definition reservationless conference bridges as needed.

Call Routing

Manage general call routing schedules, sequences and overflow destinations.

Hold Music

Upload your own hold music files and announcements to personalize the customer experience.

Dashboard Summary

View a summary of all users, phones and key group services.

Robust Search

Easily find the service information you're looking for.

Password Management

Reset voicemail, web and application passwords.

Company Directory

Add or change common contacts and phone numbers available to all employees.

Auto Attendant

Easily modify announcements and call routing for business hours, after hours and holidays.

Business Continuity

Automatically re-route calls to other phones or locations in the event of power or connectivity loss.
